

SADAB VEKARIYA

Data Analyst | BCA Student

Himmatnagar, Gujarat, India | 9328535686 | sadabvekariya2@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

BCA student with hands-on experience in Python, Pandas, NumPy, SQL, Excel and data visualization. Experienced in data cleaning, exploratory data analysis, web scraping and translating datasets into business insights through practical projects. Seeking a Data Analyst Internship or Junior Data Analyst opportunity to apply analytical skills to real-world business problems.

TECHNICAL SKILLS

Programming & Analysis: Python, NumPy, Pandas

SQL & Databases: SQL, MySQL; SELECT, WHERE, DISTINCT, ORDER BY, LIKE, NULL, AND/OR/NOT, BETWEEN, IN, GROUP BY, HAVING

Excel: Date & Time Functions: TODAY, NOW, DATE, EDATE, YEAR, MONTH, DAY; data cleaning and analysis

Web Development: HTML, CSS, JavaScript

Visualization: Matplotlib, Seaborn

Data Collection: Requests, BeautifulSoup, Web Scraping

Tools: Jupyter Notebook, Git, GitHub, VS Code

PROJECTS

Car Sales Analysis

Python, Pandas, Matplotlib, Seaborn

- Analyzed monthly sales and revenue trends across brands, fuel types and transmission categories to identify performance changes.
- Compared sales across vehicle segments to identify high- and low-performing categories.
- Used scatter plots, box plots and correlation analysis to investigate relationships, distributions and outliers.

College Placement Analytics

Python, Pandas

- Cleaned and analyzed placement data covering branch, CGPA, skills, internship status, company and package.
- Answered business-style questions including placement percentage, branch-wise average package and company-wise hiring.
- Generated actionable insights around student performance, internships and placement outcomes.

Food Delivery Data Analysis

Python, Pandas

- Performed data cleaning, missing-value handling, filtering, sorting, grouping and aggregation on food-delivery data.
- Analyzed restaurant revenue, city-wise orders, customer spending, delivery performance and ratings.
- Translated analysis into business insights aimed at understanding demand and customer satisfaction.

IMDb Movie Rating Data Collection

Python, Requests, BeautifulSoup, Pandas

- Scraped Top 250 movie information from IMDb and converted web data into a structured dataset.
- Collected fields including rank, movie title, year, IMDb rating, votes and genre.
- Cleaned and exported the collected data to CSV for downstream analysis.

EDUCATION

Bachelor of Computer Applications (BCA) — Student
